

Japanese Honeysuckle
(*Lonicera japonica*)

- Perennial, semi-evergreen, woody vine.
- Leaves simple, opposite, oblong to oval, 1.5-3" long, sometimes lobed, and may be covered with fine, soft hairs.
- Flowers tubular and very fragrant, white to pink, turning yellow with age, and occurring in pairs at leaf axils.
- Purple to black berries produced in fall.
- Invades forests and fencerows throughout Monroe County
